A photo booth is a compact, often portable kiosk or enclosure equipped with a camera and sometimes a printer, designed to take and print photographs on the spot. Typically found at events such as weddings, parties, and corporate gatherings, photo booths provide a fun and interactive experience for guests. They often come with a variety of props and backdrops to enhance the photos and encourage creativity. Modern photo booths can also offer digital sharing options, allowing users to instantly upload their photos to social media or receive them via email. The appeal of a photo booth lies in its ability to capture spontaneous, candid moments, making it a cherished addition to any celebration.
